

Ifex Hose Reel Skid

The IFEX hose reel – with its special coaxial hose of 30 to 100 meters – is designed for the use onboard all types of fire engines in combination with the IFEX impulse gun and works with the truck's water tank and pump. An air cylinder supplies the air pressure for the required number of impulse shots. For vehicles not having an autonomous water supply, such as passenger cars, station wagons etc. IFEX offers the complete solution: a hose reel with 55 meter hose, water tank and air cylinder are installed on a skid. The skid can be mounted onto a vehicle within seconds.

SYSTEM DATA

hose length	-----	30 / 55 / 80 / 100 meters
reel: length × width × height	-----	570 × 630(870) × 546 mm
reel: diameter	-----	570 mm
skid: length × width × height	-----	1150 × 660 × 830 mm
reel unit: overall weight	-----	62 / 77 / 93 / 109 kg
skid: weight, empty	-----	150 kg
water tank capacity skid	-----	72.5 liters
air cylinders	-----	2 × 6 liters, 200 bars
pressure regulator	-----	2 × 300 / 25 / 6 bar
operating pressure	-----	water 6 bar / air 25 bar
water / air connection unit	-----	3/4" / 8 mm
materials	-----	aluminum F 52, carbon Steel, galvanized steel
